UK Power Networks

PROJECT

New Power Supplies and
Network diversions for the
Crossrail Project

DURATION

36 months

VALUE

£15,000,000

www.knightwebb.co.uk

PROJECT REQUIREMENT>>

Having already been contracted by UK Power Networks as a delivery partner on a previous project, UK Power Networks instructed Knight Webb to provide project management as part of London's high profile Crossrail transport development project with a value of works at £15m.

THE SOLUTION >>

Knight Webb were instructed to project manage the complex installation of new power supplies together with the diversion of existing electricity apparatus and infrastructure as part of the overall Crossrail project enabling works.

Knight Webb introduced a structured approach to UKPN's delivery team and successfully delivered over 40 individual projects to handover to Crossrail as the client.

Crossrail will deliver a high frequency, high capacity service to 37 stations linking Maidenhead and Heathrow in the West, to Shenfield and Abbey Wood in the East via 21 km of new twin-bore tunnels under central London.

It will bring an additional 1.5 million people within 45 minutes commuting distance of London's key business districts.
